Expected Result:				

Description

Steps to duplicate:
1- search for an item that has values in the database and make sure the fields are displayed with correct values
2- search for a defined item that it's mapped item has no values in the DB in a certain date

the fields are displayed in the screen holding the previous item values,
it's expected to hide the table of mapped items and the fields of item details

Related requirement in SRS under
4   Item General Details (□□□□□ □□□□ □□□□□□□)

Tested and verified the following scenarios:
1- when the user searches for a defined item that does not exist (incorrect barcode) > the system shows no results and the message □□□□□ □□□□ □ □□□□□
2- when the user searches for a defined item that exists but has no data mapped to it, or no data in the date specified > the system displays only the header (general info for the item)
3- when the user searches for a defined item with no data after searching for an item with data displayed ==> the system displays only the header (general info for the item)
