Description			
1- the field <input type="text"/> should be much wider to fit large data that the user may enter			
2- the flight time should be removed from the field <input type="text"/> in the report generated			
3- in both Submission form and report the word <input type="text"/> should be <input type="text"/>			
4- No validation is set to the data type entered in the field <input type="text"/> as it's set in the DB as varchar type, do we have a confirmation with that ?
