Description

- the date in the events is shifting one day, the same old bug is represented
- the search in the contents page is only working for english names, even if you are using the system in arabic
- Remove Preferences tab
- Images on Intranet portal
- Services (when to be displayed)
- COOP users on intranet portal
- trim the html from the content editor
- remove the (x) action from the announcement on homepage
- user menu design
- Search for connections using display name instead of user names
- Summary for the news in home page
- Activity Stream and Message does not reflect posts if the user have more than one connection
- login redirect the user to the portal home page instead of intranet or extranet portals
- The extranet users from companies can access the intranet portal if the user modified the url
- Activities tab in the user profile is not opening
- Convert the Slides to content wizard to handle validation of the dimensions.
- Limit the characters in the summary for the content wizard items(240 Character should be the maximum)
- The allowed content to be uploaded in the departments should be PDF .. for now it accepts (png,jpg,svg,PDF)
- When sorting the Announcements from the announcements page, a blank card appears between the cards.
- After editing a statistical information content, the preview tab open the content server holding an error message.
- The message board is not edited on the IE
- The Service Catalog card does not navigate between the tab unless you click on the 4th tab first .. and the first tab does not open at all.
