Expected Result:	in follow requests screen one record should display with latest status.	**Test Case ID:**	

Description

steps to reproduce:
1. Reject open file order from the supervisor.
2. loin with the researcher and open the rejected order.
3. approve it.
4. from follow requests screen search for the order number and observe the result.
....

the date of reject and the employee who have rejected the transaction should be added.
